# User Acceptance Test (UAT) Plan

Scope, participants, criteria, schedule and 20 scenarios

| | |
|---|---|
| **Document** | 20 - UAT Plan |
| **Project** | AI Customer Support Platform (fictional company: Kestrel Commerce Ltd.) |
| **Prepared by** | Project Manager (portfolio author) - self-directed simulation |
| **Status** | Simulated baseline v1.0 |
| **Project window** | 5 Jan - 13 Mar 2026 (simulated project window) |

SIMULATED PROJECT - Self-directed portfolio case study. Not professional experience, not client work, not employment. All people, figures and outcomes are fictional.

## 1. Objective and scope

Confirm, with real support users, that the platform meets the business requirements before the pilot release. UAT covers all functional requirements through 20 scenarios; performance (WBS 9.4) and security testing (WBS 9.3) run separately. Backlog item: US-28; WBS 9.5 (preparation) and 9.6 (execution).

## 2. Participants

| Role | Who | Responsibility |
|---|---|---|
| UAT lead and approver | Support Manager (Sofia Lindqvist) | Leads sessions; signs off with the Product Owner. |
| Testers | At least 3 support agents plus one backup | Execute scenarios, record results. |
| KB Admin tester | Knowledge & Content Lead | Admin and import scenarios. |
| QA Engineer | Test coordinator | Prepares data and environment, logs and triages defects. |
| Product Owner | Elena Rossi | Clarifies expected behaviour; accepts fixes. |
| Project Manager | Portfolio author | Schedules, tracks, escalates and reports. |

## 3. Entry and exit criteria

| Entry criteria | Exit criteria |
|---|---|
| Feature-complete build in staging (M5, 27 Feb)<br>No open Critical defects<br>UAT cases reviewed by the Support Manager<br>Test data loaded; testers briefed (27 Feb)<br>Load test started on the same build | At least 95% of cases executed and passed<br>No open Critical or High defects<br>Medium defects have an accepted workaround<br>Known issues listed and accepted in writing<br>Sign-off by Support Manager and Product Owner (M6, 6 Mar) |

## 4. Schedule (2-6 March 2026)

| Day | Activity |
|---|---|
| Mon 2 Mar | Kick-off; customer chat scenarios UAT-01 to UAT-09. |
| Tue 3 Mar | Escalation and agent console UAT-10 to UAT-14; defect triage at 16:00. |
| Wed 4 Mar | Admin, import and analytics UAT-15 to UAT-19; load test completes. |
| Thu 5 Mar | UAT-20, fixes retested, regression of High scenarios. |
| Fri 6 Mar | Final regression, results review, sign-off meeting (M6). |

## 5. Defect severity and handling

| Severity | Definition | Response |
|---|---|---|
| Critical | Data exposure, wrong answer on billing/legal topic, platform unusable | Stop; fix and retest same day |
| High | Core scenario fails with no workaround | Fix before sign-off |
| Medium | Scenario works with a workaround | Fix if possible; otherwise accept workaround |
| Low | Cosmetic or minor | Log; fix after pilot |

Defects are logged with steps, expected and actual results, severity and owner; QA triages daily at 16:00.

## 6. UAT scenarios

| ID | Scenario | Requirement | Tester | Priority |
|---|---|---|---|---|
| UAT-01 | Customer signs in with an emailed one-time code; reused or expired code is rejected | FR-03 | Customer (agent as tester) | High |
| UAT-02 | Customer asks a question covered by the KB and sees an AI-labelled answer with a source link | FR-07, FR-11 | Agent | High |
| UAT-03 | Customer asks a question not in the KB; assistant shows fallback and offers a person | FR-08 | Agent | High |
| UAT-04 | Customer asks for a refund approval; assistant declines and offers a person | FR-09 | Agent | High |
| UAT-05 | Customer types an email address and phone number; QA confirms the LLM prompt contains placeholders | FR-10 | QA + Security | High |
| UAT-06 | Customer rates an answer thumbs up, then changes to thumbs down with a comment | FR-12 | Agent | Medium |
| UAT-07 | Customer sees only their own conversations from the last 30 days | FR-13, FR-02 | Agent | High |
| UAT-08 | Customer clicks 'Talk to a person'; confirmation shown; escalation holds the full transcript | FR-14 | Agent | High |
| UAT-09 | Two thumbs-down in a row cause escalation to be offered | FR-14 | Agent | Medium |
| UAT-10 | Agent sees the queue oldest first with category and waiting time and opens a transcript | FR-15 | Agent | High |
| UAT-11 | A second agent cannot reply to an item already claimed | FR-15 | Two agents | High |
| UAT-12 | Agent replies and the customer sees the reply within 10 seconds | FR-16, FR-17 | Agent | High |
| UAT-13 | Customer is inactive for 5 minutes; email notification with link arrives within 60 seconds | FR-17 | Agent | Medium |
| UAT-14 | Agent resolves an item; resolution category is mandatory; item leaves the queue | FR-16 | Agent | High |
| UAT-15 | Admin creates and publishes an article; the AI uses it within 5 minutes | FR-04, FR-06 | KB Admin | High |
| UAT-16 | Admin unpublishes the article; the AI stops using it within 5 minutes | FR-06 | KB Admin | High |
| UAT-17 | Admin bulk-imports a file with valid and invalid rows; report shows both | FR-05 | KB Admin | Medium |
| UAT-18 | Manager dashboard figures match the prepared test data set; date filter works | FR-18, FR-19 | Support Manager | High |
| UAT-19 | Admin deletes a customer's data on request; conversations disappear from UI and index | FR-21 | KB Admin + QA | High |
| UAT-20 | Staff login lockout after 5 failures; each role sees only permitted screens | FR-01, FR-02 | QA | High |

## 7. UAT risks

- Tester availability (R13): dated nominations by 13 Feb, backups named.
- AI answers vary: testers record the exact wording and the golden-set run ID.
- Late defects compress the schedule: daily triage and the de-scope order apply.
